ASSET MANAGEMENT

Strategy Overview: Defensive Income

March 2025

The Defensive Income strategy provides an actively managed portfolio suitable for investors with a low tolerance to risk and/or a shorter investment horizon (from 3 years). It is particularly suitable for investors who need to drawdown against their investment to meet their spending needs and is equally suitable for an investor who seeks growth and is happy to re-invest income to do so (subject to their tax circumstances). Given the high fixed income component and as indices are typically weighted towards the most indebted companies and sectors, we take a non-benchmark approach but will be aware of benchmark performance and report against the MPI Low Risk Index.

Strategy Overview: Capital Growth

March 2025

The Capital Growth Strategy provides a medium to long term strategy that aims to provide real growth of capital with an emphasis on capital preservation by investing in a well-diversified multi-asset class portfolio. The strategy is suitable for investors with a low to medium tolerance to risk and an investment horizon of at least 5 years. The portfolio seeks to combine real growth of capital with an emphasis on capital preservation. In order to do this the portfolio has relatively wide asset allocation guidelines as well as using a wide number of asset classes. The portfolio takes a benchmark agnostic approach but reports against the MPI Low index that targets portfolios with up to a 40% equity risk.

Strategy Overview: Balanced Growth

March 2025

The Balanced Growth Strategy provides a medium to long term strategy that aims to provide real growth of capital with an advantageous risk-reward profile by investing in a well-diversified multi-asset class portfolio that combines the benefits of direct investment into bonds and equities with the advantages of a broader, multi-asset approach. The strategy is suitable for investors with a medium tolerance to risk and an investment horizon of at least 5 years. The portfolio seeks to achieve real growth of capital with a reduced downside. In order to do this the portfolio has relatively wide asset allocation guidelines as well as using a wide number of asset classes. The portfolio will largely be invested via direct equity and bond investments to provide a highly cost-effective approach. The portfolio has an unconstrained approach and will report against the MPI Medium Risk index that targets portfolios with 40% - 60% equity risk.

ASSET MANAGEMENT

Strategy Overview: Corporate Bond (Medium Duration)

March 2025

This strategy invests largely in investment grade corporate debt providing a well-balanced and diversified, medium duration portfolio of corporate bonds. These are typically rated single-A and triple-B to provide an income producing investment strategy with exposure to credit opportunities. Our house style is to focus on creating a well-diversified portfolio, by sector and issuer that targets a duration of 5 years +/-1.5 years. As indices are typically weighted towards the most indebted companies and sectors, we take a non-benchmark approach but will be aware of benchmark performance and report against the Bloomberg Sterling Aggregate Corporate 1-10 Year Bond Index. The portfolio is suitable for a medium to long term investor with a low to medium tolerance for risk. This strategy provides a balance between security, liquidity and income (or growth via re-investment).

ASSET MANAGEMENT

Strategy Overview: Equity - Income & Growth

March 2025

The Equity Income & Growth Strategy invests largely in developed world equities, providing a well-balanced and diversified portfolio of equities that are typically of larger market capitalisation companies. This strategy aims to provide lower volatility, medium- to long-term equity investment and some inflation protection. The strategy provides investors with a segregated portfolio of defensive growth equities that pay dividends that can be expected to grow. The Equity Income & Growth Strategy does not aim to reproduce a “benchmark” return, but rather focuses on meeting investor expectations. The strategy is suitable for investors with a higher tolerance to risk or as part of a balanced programme of investments. Given the concentrated and objective focused approach, we take a non-benchmark approach but will be aware of benchmark performance and report against the MPI GBP High Index.

ASSET MANAGEMENT

Strategy Overview: Equity - Global Growth

March 2025

The Equity Global Growth Strategy invests in a concentrated portfolio of leading growth companies globally, providing a well-balanced and diversified portfolio of equities that are typically of larger market capitalisation companies. This strategy aims to provide long term growth by providing investors with a segregated portfolio of quality growth companies with strong balance sheets and compound growth opportunities. This provides a diversified portfolio of global equities considered amongst the best in class in their respective fields. The Equity Global Growth Strategy does not aim to reproduce a “benchmark” return, but rather focuses on meeting investor expectations. The strategy is suitable for investors with a higher tolerance to risk or as part of a balanced programme of investments. It is not suitable for investors who need to drawdown against their investment to meet their spending needs (or at least from this portion of their investments). Income from the portfolio is anticipated to be low as the manager will emphasise growth and seek those companies able to generate ongoing high returns on capital invested. Given the concentrated, objective focused approach we take a non-benchmark approach but will be aware of benchmark performance and report against the MPI GBP High Index.

Strategy Overview: Balanced Income & Growth

March 2025

The Balanced Income and Growth Strategy provides a medium to long term strategy that aims to provide a relatively high and growing income together with capital growth by investing in the equity and debt securities of a diversified range of companies from a mix of industries. The strategy manages risk by favouring equity investment in companies with little debt, quality balance sheets and resilient earnings. Where businesses have higher debt levels and/or more cyclical earnings we favour fixed interest securities and a more senior place in the company's balance sheet. The strategy is suitable for investors with a medium tolerance to risk and an investment horizon of at least 5 years and generates a relatively high level of income. Given the concentrated and objective focused approach, we take a non-benchmark approach but will be aware of benchmark performance and report against the MPI GBP Medium Index.
